

WHY DON'T YOU JOIN THE ERN-LUNG ACADEMY 2026 ?

ERN-LUNG is one of 24 European Reference Networks for rare diseases set up and financed by the European Commission.

In 2022 we have built the ERN-LUNG Academy in close cooperation with the European Respiratory Society (ERS).

After a successful launch in 2023 with over 40 participants, and roughly the same numbers in 2024 and 2025,
we are now open for applications for the year 2026 (Jan-Dec)

Medical doctors and specialized medical staff (including nurses and physiotherapists) at all stages of their career interested in acquiring more knowledge about rare respiratory diseases are welcome to apply.

Apart from Webinars and e-Cases, the Academy consists of a practical part (observational stay) in one of the network's expert centers.

Applications are welcome from residents of EU member states and, in some circumstances, from neighboring countries (case by case decision).

The program is free for all, and the expenses (travel, accommodation) are covered for residents from the EU and from Ukraine.
